

William J. Kelly, Personnel Officer

26 May 1949

Medical Officer

Health Program

At the present time the Medical Division is providing advisory, consultant, diagnostic and treatment services to all CIA personnel. These services are in accord with legislation providing for the establishment of the same and are in conformity with the development of a Health Program.

It is recommended that official approval be granted the establishment of these services for the purpose of finalizing this portion of the Health Program and, also, for the purpose of incorporation of such activities within the scope of official CIA policy.
